

Nine Truths about Eating Disorders

- 1 Many people with eating disorders look healthy, yet may be extremely ill.
- 2 Families are not to blame, and can be the patients' and providers' best allies in treatment.
- 3 An eating disorder diagnosis is a health crisis that disrupts personal and family functioning.
- 4 Eating disorders are not choices, but serious biologically influenced illnesses.
- 5 Eating disorders affect people of all genders, ages, races, ethnicities, body shapes and weights, sexual orientations, and socioeconomic statuses.
- 6 Eating disorders carry an increased risk for both suicide and medical complications.
- 7 Genes and environment play important roles in the development of eating disorders.
- 8 Genes alone do not predict who will develop eating disorders.
- 9 Full recovery from an eating disorder is possible. Early detection and intervention are important.
